

Bridge Organic Program

Bridge organic turf programs focus on the safety and soil building benefits of organic products. This soil based approach limits the reliance on traditional synthetic treatments.

- ✓ Safe For Pets
- ✓ Safe For Children

Healthy Lawns Start Below The Surface

Lime

This treatment corrects soil PH, improves root growth, and increases fertilizer efficiency

Grub Control

Preventative treatment to control grub larvae populations before they can mature

Nutsedge Control

Nutsedge can be difficult to treat once it appears. Preventative action focused on the root structure is critical.

Treatment Schedule

Our annual packages include the services you need, when you need them.

- ✓ Early Spring Application
- ✓ Early Summer Application
- ✓ Fall Application
- ✓ Late Spring Application
- ✓ Late Summer Application
- ✓ Fall Aeration & Overseeding

*Aeration, Overseeding, & Nutsedge Treatment available on select plans or as individual services.
